

We will not be undersold !

Top quality means super high prices... right?.. **WRONG!** SOIL-THERM is now offering our incomparable **Micro-THERM** and **Micro-ELECTRIC** SVE thermal systems at our lowest prices ever! And both of these systems have energy efficiency features that will save you money all year round! If you've never used a SOIL-THERM system before, we're looking forward to having you see firsthand why technicians prefer these systems over the others.

If you find a lower price⁽¹⁾: **WE'LL BEAT IT!**

With every system, we are including options and upgrades that, in others, would cost thousands of dollars: (1) Stainless Steel Water Knockout, (2) Stainless Steel Vapor Piping, and, (3) a full 3 year warranty on our **Jet-THERM** burner. These powerful systems are surprisingly small and quiet. With superior quality construction and design, the **Micro-THERM** and the **Micro-ELECTRIC Catox** systems are premium environmental systems at a very affordable price!
