

Custom Remediation Systems

SOIL-THERM has over 22 years experience custom designing and building the finest, most innovative environmental equipment on the market. SOIL-THERM continues to provide top quality, dependable equipment, and a commitment to our customers of future longevity and support for your remediation equipment needs.

The toughest jobs in the remediation business often requires the design of custom, integrated and packaged systems to work over a wide range of tasks. Oxidizers with air strippers, air sparging, oil water separators, gw pumps, chlorinated oxidizers with scrubbers, etc. **SOIL-THERM is an expert in Custom Integrated Systems.** From our patented aerospace combustion technology to large enclosed and mobile oxidizer systems, SOIL-THERM offers you peace of mind in providing exactly the equipment you need to clean the toughest sites. And our new ReMAC internet technology lets you monitor and control your cleanup operations anywhere in the world.

Built in 2001, Soil-Therm 3000 cfm DPE Oxidizer System. Still operational today.

INTEGRATED REMEDIATION & OXIDIZER SYSTEMS

1200 cfm Chlorinated SVE Oxidizer. All Stainless and Inconel Construction.
